DISCOVER THE BENEFITS

Purpose of KNX NZ

Wouldn't it be great if you could meet a customer, consultant, architect and they were familiar with KNX and all its benefits?

This is what every Manufacturer, Wholesaler and System Integrator strives for but this goal is much more achievable if we pool our resources and skills. This is the purpose of the KNX New Zealand Association.

By working together, we can grow the New Zealand KNX Community, the KNX profile in New Zealand, work together on localized standardisation and work towards KNX being **THE** requested building automation system across New Zealand.

Why Join KNX NZ

As a KNX New Zealand member you'll be part of a rapidly growing community and gain access to knowledge, networks and resources that can help you to improve your knowledge in KNX automation and be recognised as someone who is certified to design, engineer, distribute and install KNX automation systems at the highest level. You will have the ability to promote case studies and other self-promotional material on the KNX NZ website and via the newsletter, to a wider audience.

These factors give you an edge in the market and raise your professional standing amongst potential customers.
